## **CORPORATE SOCIAL RESPONSIBILITY STATEMENT**

Science and Nature Pty Ltd was formed in 1995. Our objectives then, which remain true today, were to manufacture and supply products in accordance with the principles of value for money, educational merit and environmental responsibility. These principles are reflected in our purpose, vision and values:

### **Purpose**

Science and Nature's purpose is to produce products that are affordable for our customers to buy, that provide intrinsic educational value, meet international safety standards for materials and to ensure that packaging is minimised for the long term benefit of our environment. When sourcing new product, our aim is to only deal with suppliers who have a strong environmental ethic, use only sustainably sourced materials and comply with international labour regulations.

### **Vision**

To continue to be a leader in the market in which we trade. Leadership being manifested in product design, utilisation of new technologies and leading edge development of ideas.

### **Values**

We believe in:

- producing products that enhance the consumer's understanding of the natural environment
- delivering service to our customers beyond the expected;
- acting with honesty and integrity in our dealings with our customers;
- continual improvement and innovation.
